The Orenburg Region, with its developed economic and natural resource potential, is actively developing foreign trade relations with more than 70 countries around the world. Main foreign trade partners: Kazakhstan (21.8% of the region’s foreign trade volume), Italy (14.9%), Belarus (12.5%), Uzbekistan (9.7%), China (7.4%), Afghanistan (4.8%), Tajikistan (4.5%), Kyrgyzstan (4.1%), Turkey (3%), Hungary (2.7%).

The export component prevails in the structure of foreign trade of the Orenburg region. The import export coverage ratio for the first 9 months of 2023 was 4.85 (in January – September 2022 – 7.65).

In terms of foreign trade among the 14 regions of the Volga Federal District of the Russian Federation, the Orenburg Region rose to sixth place, ahead of the Saratov region. The share of the Orenburg Region in the foreign trade of the Volga Federal District in the first 9 months of 2023 amounted to 5.2% (growth – 0.26%).

The Orenburg region is a net exporter of products: the export of products to foreign markets exceeds the import.

The Export Support Center of the Orenburg Region has been operating since 2017. It is part of the structure of the ANO “Center for Entrepreneurship Support and Export Development of the Orenburg region”. The Center is one of the infrastructure organizations supporting small and medium-sized businesses within the framework of the national projects “International Cooperation and Export” and “Small and Medium-sized Entrepreneurship and support for individual entrepreneurial initiative”.

The Center provides support in finding foreign partners, organizes international business missions and reverse business missions, exhibition and fair events, brings companies to international electronic trading platforms, conducts training on export topics, helps with product certification.

The Center provides services free of charge or on the terms of partial co-financing.

BRASSCO is a modern Russian enterprise of a new generation, which independently develops and manufactures all the main components – both raw materials (rod, components) and ready-made technical solutions.

BRASSCO integrated metalworking enterprise combines the traditions and technologies of Italy, Japan, Germany and Russia.

The company has at its disposal more than 20 units of high-performance equipment, such as aggregate machines, robotic complexes based on lathes, aggregate machines for the production of shut-off valves (spheres), six-spindle turning machines. Production: Japan, Taiwan, Italy, China.

The logistics system has been adjusted: 2 logistics centers in Moscow and Orenburg, 2-month stocks of raw materials and finished products.

Products:
- spheres;
- molds and stamps;
- brass futorki;
- brass rods;
- cap nuts.
Vistula LLC manufactures and installs windows made of wood according to the European standard.

Currently, more than two hundred people work in modern production, the model range of designs is constantly updated and updated with new products.

The production facilities occupy more than 5,000 sq. m. Of which 600 sq. m. is a warehouse of materials and components, where a pallet storage system for profiles and materials, as well as a forwarding storage system for components, fittings, and consumables, has been successfully implemented.

The line of wooden Euro windows is equipped with an Italian painting conveyor line, a new generation four-sided milling machine, a modern press frame, special drying chambers and many others.

The Rover machine is an intelligent equipment that allows you to give the most complex shapes to a wooden beam according to a given program.

Zowosan’s painting technology guarantees absolute environmental friendliness of the coatings. The aluminum profile of the coating reliably protects the lower part of the frame and the sash on the street side from precipitation and the destructive effects of ultraviolet radiation. Modern single – and double-glazed windows with energy-saving or multifunctional glass provide high noise and thermal insulation.

Products:
- window;
- doors;
- winter gardens.

OM LLC produces a high-quality domestic HrizoPro stabilizer (granulated stabilizer in SHCHMA), which reduces costs and increases economic efficiency in the construction and operation of highways.

The granular stabilizer of HrizoPro is made on the basis of mineral fiber with the use of a binder. It is used for the construction of the top layer of the road surface – crushed stonemastic asphalt concrete (SHMA), giving it greater durability and improving its technical performance.

HrizoPro is used to hold the binder on the surface of the crushed stone during preparation, transportation and laying and prevents the binder from leaking out of the mixture.

**Consumer properties:**
- HrizoPro is made in the form of cylindrical granules of gray or brown color. The length of the granules is from 5 to 10 mm, the diameter of the granules is (4.0 ± 0.5) mm.
- Additive consumption: up to 3 kg/t of feed.
- Temperature resistance: up to 800 °C.
- Destructibility: due to its natural properties, it is easily fluffed in the mixing drum.
- Micro-reinforcement: reinforcement throughout the entire structure of the frame, as a result, prolongs the repair time, reduces track formation, eliminates plastic deformations.
- Sun, water and deicing reagents: absolutely resistant to the negative effects of not only sunlight and water, but also deicing reagents.

**Products:**
granular stabilizer of HrizoPro.
Plastic LLC is a recognized expert in the field of production of polymer systems for water supply, heating and fire extinguishing.

For more than 10 years, it has been among the TOP 5 leading manufacturers of plastic pipes and fittings under the RVC trademark.

The range includes more than 2500 items of our own production, including automatic fire extinguishing systems under the brand name AntiFire.

Plastik – a full-cycle factory, independently produces all components (from molds to finished products) using modern robotic and automated equipment, which allows full control of high product quality.

The products are manufactured according to GOST, the company’s management system is certified according to ISO 9001:2015.

The logistics system has been adjusted: 2 logistics centers in Moscow and Orenburg, 2-month stocks of raw materials and finished products.

Samara Ley LLC is a manufacturer of industrial steam generators under its own brand URAN, block-modular steam boilers URAN-MPGU and hot-water boilers URAN-MVGU, as well as industrial water treatment complexes. The company is a full-cycle production: metal, pipes and components enter the workshop at the entrance, and at the exit – the equipment is fully factory-ready. Own design department, automation and water treatment departments. The plant is the owner of a fleet of modern high-precision machines. There is a year-round firing range for factory tests of absolutely all manufactured products on all types of fuels, including gas. The design of URAN steam generators is a development of the plant, which allows us to obtain a number of unique characteristics that have no analogues on the market. Interaction with customers is organized according to the “turnkey project” system: calculation of the order, its design and manufacture, installation and commissioning works are carried out at the customer’s facility. Specialists who directly operate URANIUM steam generators and water treatment complexes are being trained.

Products:
- industrial steam generators under their own brand;
- block-modular steam boilers URAN-MPGU;
- hot water boilers of URAN-MVGU;
- mobile steam generators;
- industrial water treatment complexes.

Services:
- formalization of the customer’s technical specifications;
- designing;
- preparation of those documentation;
- commissioning;
- installation supervision/ installation;
- training;
- warranty and post-warranty service.

Samara Ley LLC operates throughout Russia and with the countries of the Eurasian Customs Union. Among the company’s clients there are both industrial enterprises – end users of equipment, and design and installation organizations.
